Conducting Research at the Schoenbaum Family Center

Are you a student interested in conducting research with young children or their families? Are you a faculty member looking for a research site or data to use in the classroom? Are you interested in presenting at an academic conference or student poster session?

The Crane Center for Early Childhood Research and Policy (CCEC) supports high-quality research with the children, parents and families of students enrolled at the A. Sophie Rogers School for Early Learning at the Schoenbaum Family Center in Weinland Park. Our school provides literacy-rich education to 100 children from birth-to five-years old from diverse religious, racial and socioeconomic backgrounds. We offer a nutrition program, social work support, clinical services in marriage and family therapy and speech-language pathology, as well as practitioner and parent workshops.

RESEARCH
Conduct research with children and their families (active research) or use data that have already been collected (archival research) for:

- Theses, dissertations or capstone projects
- Undergraduate research scholar awards
- National conference presentations
- Poster presentations at the Denman Undergraduate Research Form, EHE Student Research Forum, CCEC Symposium on Children, or CCEC Spring Distinguished Speaker event
- Peer-reviewed publications in academic journals
- Research requirements for university courses
- Sample data sets for teaching purposes
- Applications for external grant funding
- Field-initiated research projects

APPLY
1. Go to earlychildhood.ehe.osu.edu
2. Fill out the SFC Active Research Proposal or SFC Archival Research Proposal
3. Sign the SFC Research Guidelines Agreement
4. For teaching purposes only, complete the SFC Data Request for Teaching Purposes
5. Return the forms to SFCresearch@osu.edu

If your proposal is approved by the SFC Research Committee, we will offer guidance on how to apply for IRB approval and assist you with identifying a research mentor.
